

Why Tailored Aprons Offer More Comfort & Protection

Burlington Medical is the only maker of fully-tailored aprons in the industry. Think of them like a tailored suit where every inch is fit to your exact body measurements.

What are the benefits of an apron that's made just for you?

BALANCED LOADS ARE EASIER TO CARRY

Off-the-shelf aprons will never be perfectly balanced, which causes back and neck pain.

Tailored aprons distribute weight evenly across the shoulders, chest and hips to reduce strain.

LESS WEIGHT MEANS LESS MUSCULOSKELETAL STRAIN

Off-the-shelf aprons have extra protective material in order to fit a wider variety of body types.

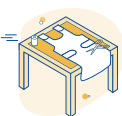

Tailored aprons eliminate excess fabric and protective material, which significantly reduces garment weight.

A BETTER FIT OFFERS SUPERIOR PROTECTION

Off-the-shelf aprons can be a bit big or small, which creates gaps, buckles and ridges that lead to unwanted exposure.

Tailored aprons eliminate areas that are vulnerable to scatter radiation, which increases protection from exposure.

HOW WE MAKE YOUR TAILORED APRON

- 1** Contact your Account Manager or call 1-800-221-3466

- 2** They will take your specific measurements

- 3** You can choose custom styles and options
